

PROSPER BUSINESS MANAGEMENT SYSTEM

Getting Started with Prosper BMS

A short guide to logging in, setting up, and running your business day to day.

Prepared for the Owner & Admin

Contents

1. Welcome

2. Logging in

3. Three things to understand before you start

4. Setting up for the first time

5. Your daily dashboard

6. Everyday tasks

7. Closing a day

8. What your team sees

9. Fixing a mistake

10. Quick reference

1. Welcome

Prosper BMS keeps track of your stock and your money across your Restaurant, Canteen, and Store — automatically, every day. You will always know what stock you have, what cash and M-Pesa you should have, and what your business made, without doing the maths yourself.

This guide gets you set up and shows you what to expect on a normal day. It takes about fifteen minutes to read.

2. Logging in

You sign in with a name and a 4-digit PIN — not an email address or password.

The sign-in screen. Enter your name and PIN here.

Your account — enter your current PIN, then your new one twice.

3. Three things to understand before you start

These three ideas explain almost everything you will see in Prosper BMS. Read them once and the rest of the app will make sense.

Locations

Your Restaurant, Canteen, and Store each keep their own stock and their own prices. Moving stock from one to another is always recorded as a transfer, so nothing goes missing between them.

Mistakes are easy to fix

If a figure was entered wrong, you can correct it. Open the day it happened, tap the number, and enter the right one. Your totals update straight away.

Handover & closing the day

At the end of each shift, your staff tell Prosper BMS how much cash and M-Pesa they collected. You confirm what you actually received. Once everything for a day is confirmed, you close that day.

4. Setting up for the first time

Do these steps once, in order, before your first real day of business.

1 Confirm your locations

Check that your Restaurant, Canteen, and Store are all set up under Catalog.

2 Add your products and their prices

Add everything you buy, sell, or make, with what it costs and what you sell it for.

3 Add your staff

Go to Staff and add each team member with their role and a starting PIN.

4 Tell Prosper BMS where you're starting from

a. Count what's currently in stock. Open **Ledger** from the menu, then **Opening Stock**, and enter the physical count for every item at every location.

Stock & Reconciliation / Opening Stock — Day 1 (2026-09-03) Discard & Back Save Baseline & Initialize Day 1

1 Opening stock — Day 1 was 2026-09-03
These are the counts the business started with on 2026-09-03 — not today's stock, which the system tracks for you. Re-entering a count corrects that Day 1 figure and changes every report since, so only do it if the original was wrong. 10 Rows

All Items Kitchen Ingredients Dishes Goods

ITEM NAME	CATEGORY	UNIT	STORE	RESTAURANT	CANTEEN	COST / BUYING	TOTAL VALUE (KES)
Chicken Breast	Ingredient	kg				500.00	-
Cooking oil	Ingredient	litre				250.00	-
Rice	Ingredient	kg				150.00	-
Chapati	Dish (Finished)	pcs				0.00 (Dish)	-
Chicken Stew	Dish (Finished)	plate				0.00 (Dish)	-

Back Save Opening Balances

1

Set your opening balances
Tell Prosper how much money the business has right now, so it can track every shilling from here. You only do this once — after this, balances update themselves from sales, handovers and expenses. This will be recorded as **3 Sept 2026**, the business's first day.

CASH AT HAND

KES

0.00

Physical cash in the till and safe right now.

M-PESA / BANK

KES

0.00

Combine M-Pesa and bank into one figure. May be negative if overdrawn.

Before you set it — an empty form.

Day 1 - 3 Sept 2026

KES 12,500.00

KES 6,400.00

Correct Cash at hand

Correct M-Pesa / Bank

After you save — your Day 1 figures, locked in.

8

You do this once. After today, Prosper BMS tracks your money and stock for you. You won't come back to this screen to log today's balance.

5 You're ready

Start recording sales, deliveries, and handovers as they happen.

5. Your daily dashboard

Your dashboard is the first thing you see when you sign in. It's your morning check — a two-minute look before you start the day.

Your dashboard — today's numbers and what needs your attention.

- **Revenue, expenses, and profit** — for today, this week, or this month, whichever you choose.
- **Cash at hand and M-Pesa / Bank** — your real balances right now.
- **Needs attention** — anything waiting on you, like a handover to receive or a day still open.
- **Close today** — the switch you use at the end of the day, once everything is confirmed.

6. Everyday tasks

Checking stock

Open **Ledger** from the menu — the page is titled *Stock & Reconciliation* — to see what's on hand at every location, and every change that got it there.

Opening balances

— what the business started with on Day 1

Transactions

Every recorded money and stock movement for this period. The figures above are derived from these rows.

Stock PurchasesDeliveriesHandoversExpensesOwner DrawsNon-Sale Consumption

1 handover · 1 awaiting receipt

STAFF	STATUS	DECLARED		RECEIVED		VARIANCE		NOTE
		CASH	M-PESA	CASH	M-PESA	CASH	M-PESA	
Cashier	Awaiting	2,000.00	400.00	—	—	—	—	Not received
Totals		2,000.00	400.00	0.00	0.00	0.00	0.00	

A handover awaiting your receipt — declared amounts on the left, waiting for you to confirm.

If what you received doesn't match what was declared, Prosper BMS shows you the difference so you can follow up before the day is closed. Once every handover for a day is confirmed, close that day from your dashboard.

8. What your team sees

Your staff each get a simpler screen built for their job. You don't need to operate these yourself — this is just so you know what they're doing.

Store Manager

Receives deliveries, issues ingredients to the kitchen, records what was made, and transfers stock to the Canteen.

Store Manager — quick actions for the day's stock work.

Cashier

Records orders and payments through the day, then declares cash and M-Pesa at the end of their shift.

Cashier — today's orders and takings.

Canteen Attendant

Receives deliveries, counts stock at the end of the day — which tells Prosper BMS what sold — and declares their handover.

Canteen Attendant — deliveries, counts, and transfers.

9. Fixing a mistake

If a figure was entered wrong — a delivery counted short, an issue logged twice — you can fix it yourself from the table.

Correcting a figure in the table

- 1 Open **Ledger** from the menu and choose the day the mistake happened.
- 2 Find the row for that item, and **tap the number** you need to change — in Received, Issued, Non-Sale, or any other column.
- 3 Type the correct figure and tap **Confirm & Save Correction**.

Tap a figure in the table, enter the correct one, and save.

Enter what the figure *should* be, not the difference. Your stock levels and totals update straight away.

If a single number covers more than one movement that day, tapping it opens the list behind it, so you can pick the exact one to fix.

Correcting your starting balance

If the cash or M-Pesa figure you entered on Day 1 was wrong, open **Financials**, then **Opening Balances**, and tap **Correct Cash at hand** or **Correct M-Pesa / Bank**.

Correcting a Day 1 figure — a warning appears before you confirm.

This is safe. Every sale, expense, and handover recorded since is completely untouched — correcting it is the same as if you had entered the right number on Day 1.

Only use this to fix a wrong Day 1 figure. It is never how you record today's cash — that happens automatically from your sales, handovers, and expenses.

10. Quick reference

Location	Restaurant, Canteen, or Store — each with its own stock and prices.
Correction	Fixing a figure that was entered wrong. Tap the number in the table and enter the right one.
Handover	The cash and M-Pesa a staff member declares at the end of their shift.
Closing the day	Sealing a business day once every handover is confirmed.
Day 1 / starting balance	What your business had in stock and cash the day you started using Prosper BMS. Set once.
PIN	Your 4-digit code to sign in — set your own after your first login.
